PROFILE

Engineering student in Computer Science (Sciences du Numérique) at ENSEEIHT, after two years of intensive preparatory classes in mathematics and physics in Oujda, Morocco. My goal is to become a skilled software engineer by deepening my technical expertise and applying analytical and mathematical reasoning to real problems. Interested in a mobility in the United States or Canada.

EDUCATION

2026 – present — Toulouse, France
Engineering Degree – Computer Science (Sciences du Numérique)
ENSEEIHT (N7) – Toulouse INP

2024 – 2026 — Oujda, Morocco
Classes Préparatoires aux Grandes Écoles (CPGE) – Mathematics and Physics
Lycée Omar Ibn Abdelaziz · two-year intensive program preparing for French engineering schools

2023 – 2024 — Driouch, Morocco
Baccalauréat in Mathematical Sciences – Très Bien (highest honors)
Lycée Moulay Ismail

PROJECTS

2024 – 2026 — CPGE, Oujda
Research project (TIPE) – ECG Signal Processing and Heart Rate Variability Analysis
- ECG signal acquisition with an AD8232 sensor and an Arduino board.
- Study of the influence of the sampling frequency and of analog and digital filtering.
- R-peak detection, RR interval extraction and heart rate variability indicators (SDNN, RMSSD, LF/HF).
- Modeling and analysis of measurement errors; data processing in Python.

2026 — ENSEEIHT
PIM course project – Guessing Game in Ada
- Algorithm designed before writing any code, following the course methodology.
- Structured programming in Ada: procedures, functions and control structures.

SKILLS

Languages	Python · Ada · JavaScript · HTML · CSS
Web	React (React.js)
Computer science	Algorithm design · Structured programming · Problem solving
Engineering	Signal processing · ECG signal analysis · Arduino data acquisition · Mathematical modeling
Soft skills	Analytical thinking · Rigor · Adaptability · Curiosity

ENGAGEMENT

2026	Climate Fresk (Fresque du Climat) – ENSEEIHT
2026	King Kong Trial (Procès King Kong) – ENSEEIHT
Sep 2023	Volunteer in the relief effort after the Al Haouz earthquake, Morocco
Morocco	Blood donor

LANGUAGES

Arabic: native
French: professional working proficiency
English: professional working proficiency
German: elementary (learning at ENSEEIHT)

INTERESTS

Sports: football (soccer), swimming
Culture: cinema, music
Languages and cultural exchange
Technology and innovation
